Our Customers, Our
People & Our Reputation**

ABOUT US

Meat Projects Australia (MPA) is a part of the Wulguru Group, a privately owned Australian steel fabrication company. With unrivalled technology, capacity and infrastructure the Wulguru Group has become one of the largest steel fabrication companies in Northern Australia.

MPA provides a complete range of specialised services for the meat processing industry including abattoir design and layout, product handling solutions and project management.

- MPA has designed and constructed abattoirs throughout Australia and overseas
- Designed full plants and / or specific equipment for a range of livestock including cattle, sheep, pigs, goats, kangaroos, buffalo & fish
- We are fully conversant in relevant standards
- MPA regularly reviews existing plants to provide solutions to increasing capacity and quality of our products

MPA offers a complete range of services with our three workshop locations, control of all stages from design, fabrication, installation and transport. Our company prides itself on exceptional customer service and is committed to its promise to deliver, quality, on site, on time.

MEAT PROCESSING

We can advise on plant and process layout, construction, operational management and can project manage the total installation.

MPA offer 36 years of knowledge and experience in the food processing industry. We have the capabilities for design and manufacturing of equipment for many applications within the Meat Processing Industry. MPA also provides a technology transfer service which encompasses plant design and layout, project management, mechanical services design,

refrigeration plant design, electrical services design, marketing, maintenance, energy surveys and usage monitoring.

We are able to provide personnel with many year's experience with hands-on operational experience in the Meat Processing Industry. Through our diverse range of contacts in the Food Industry a range of experts can be placed in an Abattoir to train new staff in

the functions of modern Abattoir Plant Management.

MPA can offer you a complete solution with services from sales and estimating team to drafting and project management. We also control our own transport and offer services such as painting and blasting. Our management team of engineers and estimators are available to discuss your project at any time.

PRODUCT HANDLING

Specialised design and manufacture of Screw Feeders and Conveyors, Bucket Elevators, Mixers and more.

MPA affiliate business Archimedes Engineering has established itself as an industry market leader, respected for its commercial and quality management policies and has earned an enviable reputation for integrity and reliability. We

have managed projects both nationally and internationally and worked with all major engineering consultants. Our equipment has been designed and supplied to PNG, Vietnam, Indonesia, The Middle East & The Pacific Islands for a wide range of industry uses.

Our solutions include:

- Conveyor systems
- Chain & belt bucket elevators
- Mixers & grease mixers
- Material handling equipment
- Storage bins
- Hoppers
